KEYLESS ACCESS SECURITY

SAL-Platinum

Premium Standalone Apartment Lock

The SAL-Platinum is an electronic apartment lock used as a standalone product that does not integration with Lock Management Software. The property owner programs and manages their own card entry into the lock face at the door. The SAL-Platinum is the simplest form of electronic hotel door lock entry for any accommodation premise Australia wide.

How it works?

A Management card and User cards are used on the lock RFID reader for keyless access. Additional User cards can only be programmed by the Management card. No software setup required.
