KAS[®]

KEYLESS ACCESS SECURITY

KAS is an Australian owned and operated company. We want to make it easier and more affordable to look after your property and its key exchange whether it's for commercial use or for your own front door.

We offer our customers unbeatable value for money on quality security products. Our product designers have over 20 years experience in keyless entry security devices.

why choose KAS.Neo?

KAS Neo locks offer a comprehensive range of features at an industry leading price point.

Our products are equally suitable for personal use as they are for Hotels, Self Storage, Schools and Corporate facilities.

- ✓ Simple, reliable access options including Pincode, RFID and Mobile Bluetooth entry
- ✓ With wireless connectivity, installation is as easy as can be. POE wired option also available.
- ✓ Option to use our Intuitive Web Console Gen 2, allowing for remote management of codes, RFID and BLE keys.
- ✓ Online not an option? Our locks can be easily operated without any network connectivity while retaining full functionality
- ✓ Compatible with almost all electric locking hardware including Mag Locks, Electric Bolts and Strikes, Motorised Gates and Doors.

KAS Gen2 Console

Managing your locks and ACRs has never been easier. Our optional Gen2 Console is your key to simple yet powerful remote management of pincodes, Bluetooth and RFID access credentials for 1-1000 locks.

👤 User Friendly Workflow

Designed with the end user in mind, our Gen 2 console makes it easy to add pincodes, RFIDs and Mobile Bluetooth keys to multiple locks at the same time. Simply select a predefined group of locks, add additional locks, scan your RFID or select a pincode

🔗 Open API for Integration

KAS are always looking to increase compatibility with 3rd party systems. We already integrate with the industries leading RMS and BMS software and provide our open API free for 3rd party integrators, allowing of control KAS locking hardware through 3rd party software.

Manage your Locks Remotely

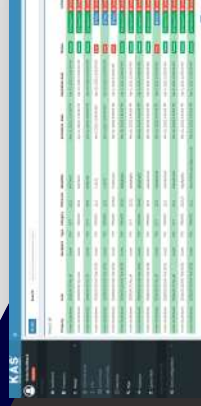

Imagine a completely unattended check-in process. A system where guests are sent their keys electronically to their mobile device and that device is used to gain entry to their room.

Imagine a system where lost keys can be replaced from anywhere in the world, without staff attendance. KAS Neo Locks and ACRs combined with Gen 2 console provide the flexibility to manage entry to your premises the way you want. Ask us how KAS can be part of the remote management solution you've been dreaming of.
