KAS®
KEYLESS ACCESS SECURITY

KAS Neo is a complete Keyless Entry Solution allowing remote management of room, lift, floor and common door access.

HOTEL ACCESS CONTROL

KAS NEO BATTERY LOCK

Suitable for guest room entry. KAS Neo Lock is battery powered. Add an S1 Gateway to allow for wireless remote control with our Gen2 web console 'KASAccess'. 6-12 months battery life*.

KAS NEO ACR2 ACCESS CONTROL READER

Suitable for high use entries and common doors, our 12-24v Access Control Readers (ACR) feature secure solid state relays, wireless communication to KAS S1 Gateway and interfaces with virtually all electric locking hardware.

KAS PIR SMART ENTRY SENSOR

The PIR Smart Entry Sensor provides additional security status monitoring and feedback to our KASAccess web console. Monitor for entry and exit events, security alarms and 2x door / window position switches.
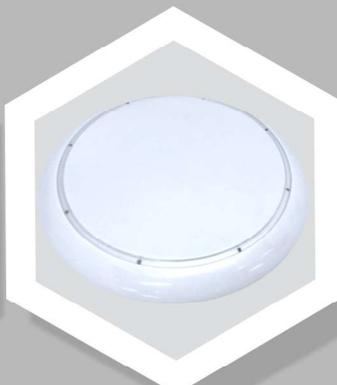

KAS S1 GATEWAY

The S1 Gateway transmits data to and from each lock. Each Lock / ACR2 or Lift Controller needs to be within line of sight to an S1 Gateway.

KAS LIFT CONTROL (LCR)

Remotely manage lift call and lift access for up to 128 floors with the KAS Lift Controler (LCR) and Relay Module (RM). The combination of LCR and RM provides all the features of our ACR2 while allowing for remote configuration of lift floor keys via our Gen2 web console 'KASaccess'.

KAS ACCESS GEN2 WEB CONSOLE

Our cloud hosted KAS**Access** is the heart of our Online keyless entry system. Effortlessly allocate RFID cards and FOBs, Pins and Mobile BLE Keys to Neo Locks, ACR2s and Lift Controlers remotely. S1 Gateways Required*. API also available.
